Allowable Subject Matter

1. Claims 1-40 allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to an aircraft instrumentation display system. Each independent claim identifies the uniquely distinct features "selecting a new predetermined subset of said subject plurality of pixels for the flight parameter, said new predetermined subset of said subject plurality of pixels being different from said current predetermined subset of said subject plurality of pixels, and repeatedly generating graphically rendering the aircraft flight information on the display, comparing the dynamically changeable input data at each predetermined image updating refresh intervals, with an updated presentation of the dynamically changeable graphically depicted flight parameter and to compare the comparison imaging data corresponding to the new predetermined subset of said subject plurality of pixels to the corresponding rendering computer generated current imaging data for actuating the new predetermined subset of said subject plurality of pixels for the updated presentation of the flight parameter on the display" in combination with the manner claimed. There is no prior art(s), either singularly or in combination, anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

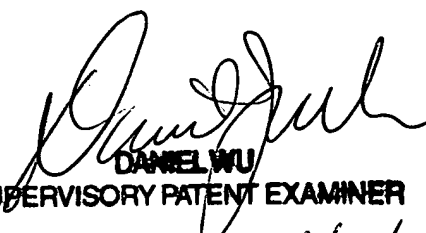

Art Unit: 2632.
